SUMMARY

Full Stack Web Developer with 1+ year of hands-on experience in building and deploying scalable web applications. Strong foundation in modern technologies with proven analytical, leadership, and problem-solving skills. Seeking a challenging role in a dynamic organization, with a willingness to relocate.

SKILLS

Languages

TypeScript, JavaScript, Python, SQL

Frameworks

NextJS, NestJS

Tools & Technologies

Git, GitHub, Docker, CI/CD (GitHub Actions), Prisma, Supabase Azure (VM deployment)

Databases

PostgreSQL, Supabase, NeonDB

EXPERIENCE

Web Developer

Amrita Vishwa Vidyapeetham, Amritapuri

03/2025 – Present
Kollam, Kerala

- Developed scalable web applications using Next.js, Prisma, PostgreSQL, Supabase, and NestJS (with Next.js frontend).
- Built and delivered 4+ RBAC-based web applications with secure role management systems.
- Maintained and optimized existing websites for performance, reliability, and user experience.
- Led interns and managed end-to-end application development, from design to deployment, including production monitoring.

PROJECTS

CIR Dashboard: Responsibility, Timetable & Classroom Management System

Tech: Backend: NestJS, Prisma | Frontend: Nextjs

Developed a role-based platform to manage organizational hierarchy, responsibility assignments, and timetable scheduling across departments, implemented classroom allocation, semester-based scheduling, and Excel reporting, built workflows for work submission and verification, and designed analytics dashboards to monitor performance, serving as a core contributor and leading interns.

HMS Amrita: Hostel Stayback Management System

Tech: Next.js | Prisma | Supabase

Built a role-based web application with multi-level approval workflow and real-time request tracking, and designed an end-to-end request lifecycle with cascading approvals and role-specific dashboards.

Corporate Website, Portal & CMS Development

Tech: Nextjs | Prisma | zod | auth.js | shadcn | chartjs

Developed a scalable company website and integrated portal with a Blog CMS and career section for hiring and applicant tracking, while implementing Role-Based Access Control (RBAC) for secure and structured access management
